Output Board as Line Amp floating configuration.

For floating configuration:
R21, R22, R23, R24, R27, R28 = 20k
R25, R26 = 1Meg

For non-floating configuration:
R25, R26 = 10k
Omit R21, R22, R23, R24, R27, R28

This circuit is repeated 8 times
R25, R26, R27, R28, C9, C10
really do connect to chassis ground,
not audio ground, but in this assembly
they are connected together.
